A range of retrofittable, or new build Rear Door Coolers with an unrivalled and sustainable cooling range from 0.1kW to 200kW plus per rack

Hot and Cold Aisle Containment Solutions

GEM2
(Generation Modular)

Legrand **GeM2** offers to corporate and commercial data centers a cost-efficient "pay-as-you-grow" solution in order to create efficiency at low initial investments (CAPEX).

The free-standing corridor is a fully self-supporting aisle containment system which allows closed-off aisles to be created independently from the IT racks, a unique feature in the data center market.

MADE IN SINGAPORE

Sensor Controlled Lighting

Electronic Roof Release System

Optional Automated Door Entry System

Modular
- Free Standing
- Unlimited Racks
- Retro - fitting
- Flexible

Efficient
- Short Deployment time
- Minimum wastage of cold air
- Minimum Mixing of hot and cold air
- Lighting Management

Safe
- Fire rated UL94 polycarbonate panel
- Electronic roof release panel
- High security
- Compliant with Singapore fire regulation
